

Learn how to use the binkybox.

1
Familiarize your child with the binkybox and how to take out a pacifier.

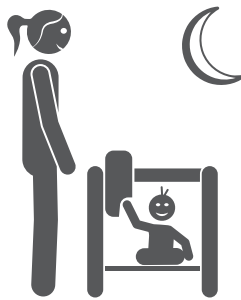

2
Install the binkybox on a crib and fill it as described in the operating instructions. Fill the binkybox without any gaps.

3
Before your child falls asleep, point out where the binkybox is located. Practice removing a pacifier once again.

4
For the first few nights, help your child find the binkybox and practice removing a pacifier from the binkybox again. Guide your child's hand to the binkybox and allow it to remove the pacifier by itself.

Before long, your child will require less assistance to remove the pacifier.

We wish you a restful night's sleep.
